About Muscat MediCare

Why Muscat MediCare

Muscat Medicare 2025 is set to be Oman's premier healthcare exhibition bringing together a diverse range of exhibitors showcasing the latest advancements in medical technology pharmaceuticals, and healthcare services.

This inaugural event will serve as a vital platform for healthcare professionals, industry leaders, and the general public to explore and engage with the evolving landscape of healthcare in Oman.

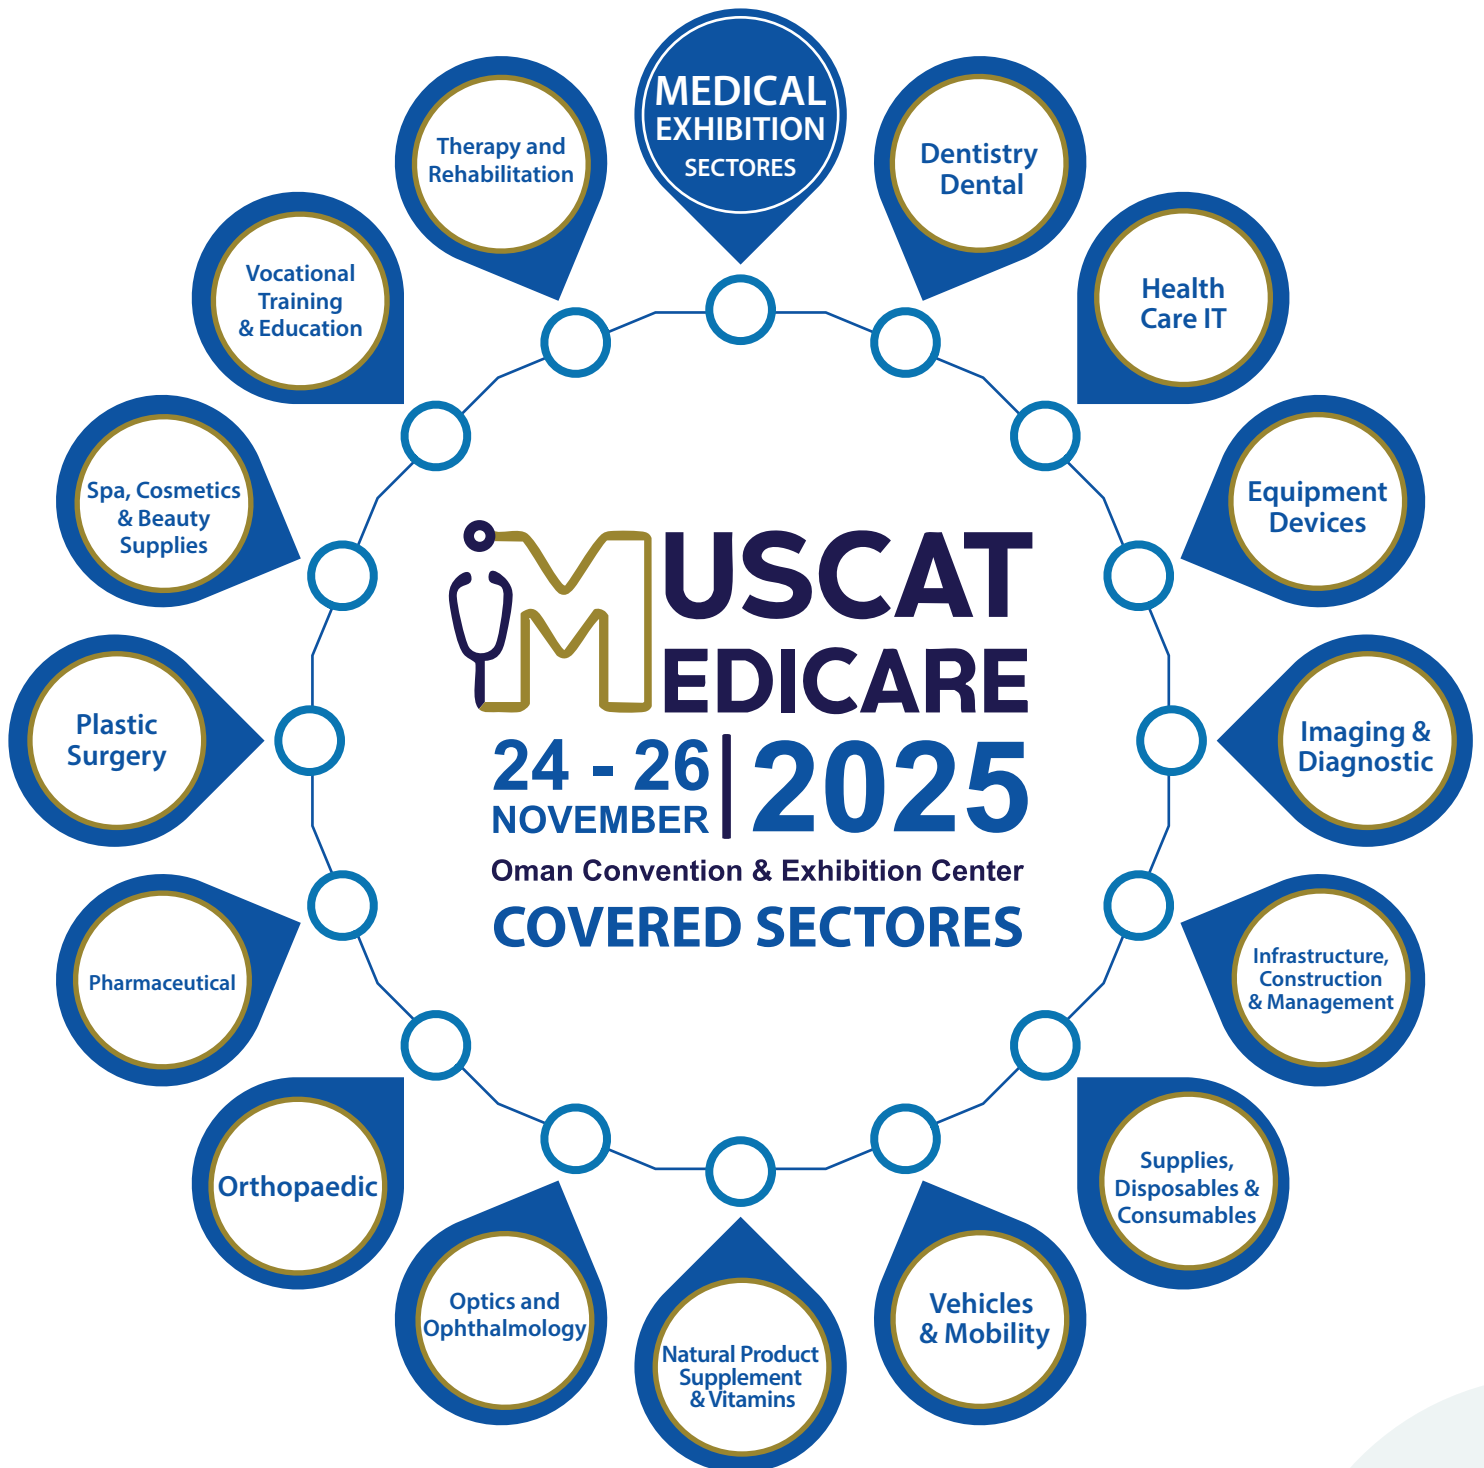

Objective

The primary objective of this exhibition is to highlight Oman's advantageous investment climate. Key factors contributing to this favourable environment include the supportive framework of free trade zones, cost-effective shipping facilitated by access to open seas, and Oman's stable international relations. These elements create an ideal atmosphere for businesses to invest, grow, and thrive.

Notably, Oman offers the lowest tax tariffs for exports/imports to the United States
